

The Part Number:

# 6-201005EF14-GAC

**PRODUCT NAME:** GAC Taste & Odor Inline Filter

**RAW MATERIAL:** Coconut Activated Carbon

- FEATURES & BENEFITS:**
- Encased in a plastic body
  - Good for environments where taking out the filter and replacing it in a housing is not ideal, such as a dusty manufacturing environment
  - No need to touch filter media
  - Features quick connect connections that allow for quick and easy changing

| Technical Data           |                                  |
|--------------------------|----------------------------------|
| Model                    | T33-1                            |
| Size                     | 2 inch diameter x 10 inch length |
| Port                     | 1/4 in QC                        |
| Micron                   | 5,10                             |
| Material                 | Coconut Activated Carbon         |
| Max Water Flow Rate      | 0.75 GPM                         |
| Service Life             | 1500 GAL                         |
| Maximum Temperature      | 52 °C                            |
| Maximum Working Pressure | 125 PSI                          |
